

Amare HL5[®] Peach

Support Healthy Aging
from the Inside Out

What It Is

A blend of hydrolyzed collagen peptides that help rejuvenate your body, helping you look, feel and move with youthfulness and resilience.*

Why You Need It

You do a lot every day. Whether you're chasing big goals or just trying to stay balanced, your body deserves extra support that you can feel good about.

How it Works

Hydrolyzed Collagen Peptides from Types 1 & 3 Collagen work from the inside out to help support skin firmness and elasticity. They also support lean body mass, help maintain bone density, support strength, and joint mobility.*

- **Collagen Type 1** - The most abundant type in the body, helping to support healthy skin, hair, bones, and joints by providing structure and strength.*
- **Collagen Type 3** - Works alongside Type 1 to support soft connective tissues—like skin and muscles.*

The Science

Your body's natural collagen production starts to slow in your mid-20s—declining about 1% each year. As levels drop, it starts to show. Your skin might feel less firm, fine lines become more noticeable, and even your joints may not feel as strong as they used to. Supplementing with hydrolyzed collagen peptides helps replenish key building blocks to support healthy aging from the inside out.*

How to Use

Enjoy one pouch of HL5 daily as part of your wellness routine.

Supplement Facts

Serving Size: 1 Pouch (30 mL)
Servings Per Container: 30
