

Amare GBX Slim2Fit™

Full Circle Weight
Wellness Support*

What It Is

Unlike most weight management supplements that target only one area, GBX Slim2Fit™ delivers a multi-pathway approach that supports:

1. Appetite signaling*
2. Metabolic efficiency*
3. Fat-burning activity*
4. Gut-brain axis wellness*

For comprehensive weight wellness support.**

How It Works

Amare GBX Slim2Fit™ is a next generation weight management supplement that supports your weight wellness journey from appetite and metabolism to fat burning and gut health.*†

Powered by a scientifically substantiated proprietary blend of ingredients—including Slendesta® and Capsifen®—to help you:

- ✓ Optimize how your body converts fuel into energy*
- ✓ Help you feel satisfied and balanced*
- ✓ Support the body's natural release of Cholecystokinin (CCK) — the gut's own "I'm full" signal*
- ✓ Promote your body's natural thermogenesis*
- ✓ Nurture the microbiome to influence mood, metabolism, and motivation....all in one future-forward supplement*

Why You Need It

You're committed to progress that sticks—not a quick fix. That's why a full circle approach matters—one that supports metabolic function, balanced appetite cues, steady energy and a resilient gut-brain connection.* †

Key Ingredients

GBX Slim2Fit™ is powered by science-backed ingredients to support your weight wellness journey.*

- **Slendesta®** – a clinically and scientifically studied satiety ingredient derived from potatoes, to aid in appetite control for healthy weight management. It contains a protein called Proteinase inhibitor II (PI2) which works by supporting the body's natural release of cholecystokinin (CCK), a gastrointestinal hormone which sends the signal to the brain that the stomach is full.*
- **Capsifen®** – a clinically and scientifically studied, patented unique red chili pepper complex that supports thermogenesis, energy expenditure, fat oxidation, satiety, appetite control and endurance.*
- **Chromium Picolinate** – helps support healthy metabolism and blood sugar/glucose levels.*
- **Green Banana Powder** – alongside Slendesta®, it acts as a prebiotic, supporting beneficial gut microbiota. It's a resistant starch, a fiber, that helps support gut health and satiety.*
- **Black Chia Seed** – an expanding, prebiotic fiber.
- **Ginger** – used traditionally for thousands of years to support digestive health.*

The Science

GBX Slim2Fit™ is the next generation of weight management supplements, addressing every part of the weight wellness journey from appetite and metabolism to calorie burning and gut health. Formulated by an expert physician and team of scientists, GBX Slim2Fit is designed to fill the gaps where traditional approaches fall short, enhancing the full circle of physical and mental factors that support sustainable weight wellness.*

By supporting the body's natural release of Cholecystokinin (CCK)—the gut's own "I'm full" signal—it helps you naturally regulate hunger and fullness. The natural release of cholecystokinin happens when

fat and protein reach the small intestine, helping coordinate digestion and signaling fullness. While others chase trends, we're pioneering what's next—a holistic approach rooted in the Gut-Brain Axis*

How To Use It

- Take one capsule twice daily with 8oz of water 30 minutes before your two largest meals.
- Use consistently for best results.
