

Amare GBX Syn™

NPN#: 80141170
Daily Wellness Support

What It Is

A targeted blend of essential amino acids and powerful antioxidants, designed to support muscle protein synthesis and help protect cells from oxidative damage.

Why You Need It

Your body is constantly exposed to free radicals that can damage cells and affect overall health. This formula delivers essential amino acids involved in muscle protein synthesis alongside antioxidants to protect cells against oxidative damage for overall wellness. GBX Syn provides an easy, effective way to give your body the daily support it needs.

How It Works

- BCAAs (branched-chain amino acids) are essential amino acids involved in muscle protein synthesis.
- Antioxidants help protect cells from oxidative damage caused by free radicals.
- Your body can't produce essential amino acids on its own, so supplementation can help maintain good health.

The Science

Amare GBX Syn is rich in essential amino acids—including branched-chain amino acids (BCAAs) which play a key role in muscle protein synthesis for the maintenance of good health. Combined with powerful antioxidants, this formula helps protect cells from oxidative damage caused by free radicals. Together, BCAAs and antioxidants provide a science-backed approach to supporting your body at both the muscular and cellular level.

How to Use

- Take 2 capsules of GBX Syn per day with 8 oz. of water.
- Consult with a health care practitioner for use beyond 5 weeks.

Medicinal ingredients (per capsule):

Guinea-pepper (Aframomum melegueta seed extract; 12.5% 6-paradol)	20 mg
Hydrolyzed carrot fibre (Daucus carota root)	75 mg
