

# Densify Dream Styling Cream

Styling Without Compromise

## Your Hair Tells a Story. Are You Listening?

Daily stressors, nutrition, and your body’s natural cycles can impact hair health. Our Rootbiomic Ferment™ helps support how your hair looks and feels from root to tip.

## What It Is

Meet your new styling ritual. Powered by the K-beauty science of fermentation, this treatment-infused styling cream delivers visibly thicker, fuller, more voluminous hair—whether you blow dry for lift or air dry for a softer, natural finish. The result: enhanced thickness, amplified volume, and a weightless, touchable hold that moves with you. Built-in heat protection and frizz control work across curls, waves, and natural texture. This is styling without compromise.

## Why You Need It

You know that feeling when your hair just works? When it moves right, holds its shape, and still feels like hair—not product? That’s what Densify Dream Styling Cream was made for. Visibly fuller, thicker-looking volume with a hold so weightless you’ll forget it’s there. Every blowout. Every air dry. Every time.

## How it Works

Apply to damp hair before blow drying or air drying for maximum volume and thickness. Use on dry hair to enhance texture or tame flyaways. Either way, this formula works with your hair—not against it.

## Features & Benefits

- Visibly improves thickness and fullness
- Increases volume for blowouts and air-dried styles
- Enhances curls, waves, and natural bounce
- Weightless, soft, touchable hold
- Controls frizz—without silicone
- Heat protection built in
- No buildup

Perfect For Voluminous blowouts · Defined curls · Enhanced waves · Weightless air dries

## Key Ingredients

**Rootbiomic Ferment™** uses fermentation to transform botanicals into potent, bioavailable nutrients your scalp and strands can actually use. Think of it like kombucha for your hair: nutrient-rich, easily absorbed, and designed to work with your biology—not against it.

**Biovolume** provides an instant volumizing and thickening effect while improving hair hydration.\*

**Fermented Polypeptides** offer a weightless, buildup-free alternative to heavy silicones—giving you hold that moves with your hair, not against it.

## Usage

Apply about a quarter sized amount or more to damp hair before air drying or heat styling. Can be used on dry hair to enhance texture and smooth flyways.

\*Instant volumizing and fullness was measured after wet hair air dried
